Software Engineering (UE20CS303)

PROJECT SYNOPSIS

AUTOMATED LEAVE MANAGEMENT SYSTEM

TEAM:

SRN	NAME	GROUP
PES2UG20CS248	Pranav Rao Rebala	
PES2UG20CS224	Nihal Chengappa P A	9
PES2UG20CS225	Nilesh Ravichandran	
PES2UG20CS226	Niranjan SS	

The Automated Leave Management System is an importance in every organization. The system enables automated leave applications and approvals workflow.

The project will be done using Python's GUI – Tkinter and MySQL for database management.

Functionality:

- Allows employees to apply for a leave
- Allows admin to grant/deny the employees' leave

Plan of work:

1. Database creation using MySQL and providing its functionality in windows – Nihal
2. Interface home window creation using Tkinter – Pranav
3. Admin's window creation using Tkinter – Nilesh
4. Employee's window creation using Tkinter – Niranjan
